PERSONAL LOAN
at your fingertips !

[Check Loan Amount >>](#)

- ✓ No Paperwork
- ✓ Pre-approved
- ✓ Money in 10 seconds

The banner features a blue background with white and red text. On the right, there is a circular image of a man with a beard looking at his smartphone. The text 'PERSONAL LOAN at your fingertips !' is prominently displayed. Below it is a red button with white text 'Check Loan Amount >>'. To the right of the button are three green checkmarks, each followed by a benefit: 'No Paperwork', 'Pre-approved', and 'Money in 10 seconds'. The man in the image is wearing a plaid shirt and is looking down at his phone.

Archives of Physiotherapy

[Home](#)[About](#)[Articles](#)[Submission Guidelines](#)

About ▾

[Contact](#)[Editorial Board](#)

About

Aims and scope

Archives of Physiotherapy is an open access journal disseminating research covering all aspects of physiotherapy. Featured topics include clinical trials in different areas of disability (musculoskeletal, neurological, cardio-pulmonary), diagnostic, measurement-focused, observational, prognostic and qualitative studies, as well as systematic reviews, meta-analyses and case reports. The journal also welcomes Letters to the Editor, which provide thoughtful debate on issues of concern to the physiotherapy profession and related disciplines.

Archives of Physiotherapy is the official journal of the [Italian Society of Physiotherapy \(Società Italiana di Fisioterapia, S.I.F.\)](#), the [University of Applied Sciences and Arts of Southern Switzerland](#). The journal was formally published under the title *Italian Journal of Physiotherapy*.

Open access

All articles published by *Archives of Physiotherapy* are made freely and permanently accessible online immediately upon publication, without subscription charges or

registration barriers. Further information about open access can be found [here](#).

As authors of articles published in *Archives of Physiotherapy* you are the [copyright holders](#) of your article and have granted to any third party, in advance and in perpetuity, the right to use, reproduce or disseminate your article, according to the [BMC license agreement](#).

For those of you who are US government employees or are prevented from being copyright holders for similar reasons, BMC can accommodate non-standard copyright lines. Please [contact us](#) if further information is needed.

Article-processing charges

Open access publishing is not without costs. Archives of Physiotherapy therefore levies an article-processing charge of EUR 1890 / GBP 1590 / USD 2190 for each article accepted for publication, plus VAT or local taxes where applicable.

If the corresponding author's institution participates in our open access membership program, some or all of the publication cost may be covered (more details available on the [membership page](#)). We routinely waive charges for authors from [low-income countries](#). For other countries, article-processing charge waivers or discounts are granted on a case-by-case basis to authors with insufficient funds. Authors can request a waiver or discount during the submission process. For further details, see our [article-processing charge page](#).

BMC provides a free open access funding support service to help authors discover and apply for article processing charge funding. Visit our [OA funding and policy support page](#) to view our list of research funders and institutions that provide funding for APCs, and to learn more about our email support service.

For more information on APCs please see our [Journal Pricing FAQs](#)

Publication costs for manuscripts meeting specific criteria will be covered by the journal

partner. Please contact the journal Editor for further information.

Indexing services

All articles published in *Archives of Physiotherapy* are included in:

- PubMed
- Cinahl
- DOAJ
- EBSCO

The full text of all articles is deposited in [digital archives](#) around the world to guarantee long-term digital preservation. You can also access all articles published by BioMed Central on [SpringerLink](#).

We are working closely with relevant indexing services including PubMed Central and Web of Science (Clarivate Analytics) to ensure that articles published in *Archives of Physiotherapy* will be available in their databases when appropriate.

Peer-review policy

Peer-review is the system used to assess the quality of a manuscript before it is published. Independent researchers in the relevant research area assess submitted manuscripts for originality, validity and significance to help editors determine whether the manuscript should be published in their journal. You can read more about the peer-review process [here](#).

Archives of Physiotherapy operates a double-blind peer-review system, where the reviewers do not know the names or affiliations of the authors and the reviewer reports provided to the authors are anonymous.

The benefit of double-blind peer review is that it allows reviewers to judge the manuscript based on content alone, and they are not unconsciously biased by knowledge

of who the authors are.

All submitted manuscripts are evaluated by the Editor-in-Chief and by the Section Editors and suitable manuscripts are sent to Associate Editors who handle the peer review process. These manuscripts will generally be reviewed by two or more external experts who will be asked to evaluate whether the manuscript is in line with the scope of the journal, whether it is scientifically sound and coherent, whether it duplicates already published work, and whether or not the manuscript is sufficiently clear for publication. Final decisions will be made by the Section Editors, based on these reports.

Editorial policies

All manuscripts submitted to *Archives of Physiotherapy* should adhere to [BioMed Central's editorial policies](#).

Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

Citing articles in Archives of Physiotherapy

Articles in *Archives of Physiotherapy* should be cited in the same way as articles in a traditional journal. Because articles are not printed, they do not have page numbers; instead, they are given a unique article number.

Article citations follow this format:

Authors: Title. *Arch Physiother* [year], [volume number]:[article number].

e.g. Roberts LD, Hassall DG, Winegar DA, Haselden JN, Nicholls AW, Griffin JL: Increased hepatic oxidative metabolism distinguishes the action of Peroxisome Proliferator-Activated Receptor delta from Peroxisome Proliferator-Activated Receptor gamma in the Ob/Ob mouse. *Arch Physiother* 2009, 1:115.

refers to article 115 from Volume 1 of the journal.

Appeals and complaints

Authors who wish to appeal a rejection or make a complaint should follow the procedure outlined in the [BMC Editorial Policies](#).

Benefits of publishing with BMC

High visibility

Archives of Physiotherapy's open access policy allows maximum visibility of articles published in the journal as they are available to a wide, global audience.

Speed of publication

Archives of Physiotherapy offers a fast publication schedule whilst maintaining rigorous peer review; all articles must be submitted online, and peer review is managed fully electronically (articles are distributed in PDF form, which is automatically generated from the submitted files). Articles will be published with their final citation after acceptance, in both fully browsable web form, and as a formatted PDF.

Flexibility

Online publication in *Archives of Physiotherapy* gives you the opportunity to publish large datasets, large numbers of color illustrations and moving pictures, to display data in a form that can be read directly by other software packages so as to allow readers to manipulate the data for themselves, and to create all relevant links (for example, to PubMed, to sequence and other databases, and to other articles).

Promotion and press coverage

Articles published in *Archives of Physiotherapy* are included in article alerts and regular email updates. Some may be highlighted on *Archives of Physiotherapy's* pages and on the BMC homepage.

In addition, articles published in *Archives of Physiotherapy* may be promoted by press releases to the general or scientific press. These activities increase the exposure and number of accesses for articles published in *Archives of Physiotherapy*. A list of articles recently press-released by journals published by BMC is available [here](#).

Copyright

As an author of an article published in *Archives of Physiotherapy* you retain the [copyright](#) of your article and you are free to reproduce and disseminate your work (for further details, see the [BMC license agreement](#)).

For further information about the advantages of publishing in a journal from BMC, please click [here](#).

About this journal

Aims and scope

The European Journal of Physiotherapy is an international journal covering all aspects of physiotherapy with special focus on:

- Physiotherapy in lifestyle-related health problems
- Functioning, activity and participation
- Behavioral medicine in physiotherapy
- Disability and health in areas of pain
- Physical activity in health promotion and rehabilitation

The journal covers Original articles either as full-length report or as Short communications reporting preliminary data from original work, Case reports, reporting new and important clinical observations or experiences of a novel treatment, all types of Review articles, Focus papers, Debate articles, and Short commentaries for the EJPT relevant topics, as well as Letters to the editor. The journal also aims at maintaining a broad and interdisciplinary approach in order to reflect collaboration with practitioners and scholars from other disciplines.

The aims are:

- Evaluating and criticizing interventions and methods used in health promotion, lifestyle change, rehabilitation, pain related conditions, and physical activity research
- Analyzing and debating research focused on topics in functioning, activity and participation
- Contrasting different research perspectives on essential phenomena and questioning traditional paradigms in the special focus areas
- Challenging and developing theoretical models in behavioral medicine in physiotherapy and physical activity research
- Discussing educational and professional issues of physiotherapy in broad perspective
- Improving implementation of research findings into clinical physiotherapy practice

Index to Dental Literature (NLM)
PEDro
PubMed Central Selective Deposit Medicine & Health (NLM)
Scopus (Elsevier)
Swemed

Open access

European Journal of Physiotherapy is a hybrid open access journal that is part of our [Open Select](#) publishing program, giving you the option to publish open access. Publishing open access means that your article will be free to access online immediately on publication, increasing the visibility, readership, and impact of your research.

Why choose open access?

- **Increase the discoverability** and readership of your article
- **Make an impact** and reach new readers, not just those with easy access to a research library
- **Freely share your work** with anyone, anywhere
- **Comply with funding mandates** and meet the requirements of your institution, employer or funder
- **Rigorous peer review** for every open access article

Article Publishing Charges (APC)

If you choose to publish open access in this journal you may be asked to pay an Article Publishing Charge (APC). You may be able to publish your article at no cost to yourself or with a reduced APC if your institution or research funder has an [open access agreement or membership](#) with Taylor & Francis.

If you choose not to publish Open Access in this journal, there is no Article Publishing Charge (APC).

[Use our APC finder to calculate your article publishing charge](#)

Welcome to IJAR

International Journal of Physiotherapy and Research (IJPR) is an open access, peer-reviewed, Bimonthly publishing online & print journal that encompasses all academic and clinical aspects of Physiotherapy, emphasizing on providing the base line data for the academic, clinical and research areas, thus to maintain the high level standards in the academic practice and research in the field of Physiotherapy

Topics of interest include, but are not limited to : Anatomical Aspects of Physiotherapy, Biomechanical Aspects of Physiotherapy, Physiological Aspects of Physiotherapy, Exercise Physiology, Physiotherapy Techniques, Cardiovascular Physiotherapy, Musculoskeletal Physiotherapy, Neurological Physiotherapy, Sports physiotherapy, Physiotherapy Rehabilitation, Geriatric Physiotherapy, Physiotherapy treatment modalities, Fitness Training, Rare images in clinical practice. We aimed to work to get the maximum visibility in different search engines and rapid indexation with various public and private agencies.

International Journal of Physiotherapy and Research (IJPR) aims to provide an international forum for encouraging noble discussions and thus contributing the for best treatment aids for the rehabilitation to the needy and also benefiting readers and authors by accelerating the dissemination of research information providing maximum access to advanced current academic and clinical information through Evidence based practice.

Emerging Sources Citation Index Web of Science™

International Journal of Physiotherapy (IJPHY) is an open-access, peer-reviewed, quarterly journal. IJPHY aims to publish quarterly and accepts for publishing original and research articles, meta-analysis and review papers, case histories or single case studies, book reviews, physiotherapy education, reports from scientific conferences and professional training sessions, letters to the editor concerning functional disorders within the body and the possibilities of prevention and treatment as well as the application of different methods of physiotherapy.

The mission of the International Journal of Physiotherapy (IJPHY) is to publish genuine and original research, provide free access to articles for students, academicians, and clinicians for future studies, and establish a database for researchers and clinicians to implement research findings into clinical Physiotherapy practice. The vision is to evolve into a leading journal that publishes high research standards in physiotherapy.

Current Journal Acceptance and Rejection Statistics:

Acceptance Rate	5%
Rejection Rate	95%

Important Notice

Please note that the International Journal of Physiotherapy (IJPHY) logo has been legally registered under the Trade Mark Act 1999, registered section 8(1), 25(2) with the Office of the Registrar of Tread Mark (IP India). Authors should be aware that we are not associated with other websites, journals, or clinics that might mimic our similar logo. INTERNATIONAL JOURNAL OF PHYSIOTHERAPY shall not be held responsible for any payments or articles sent to those journals or websites.

Open Access Policy

All content published in the International Journal of Physiotherapy (IJPHY) is freely available online under an Open-Access model. By the definition of the Budapest Open Access Initiative, all content published by the IJPHY is made free to users without any subscription or other charges. Users are permitted to read, download, copy, distribute, print, search, or link to the full text of these articles or use them for any other lawful, non-commercial purpose.

IJPHY preserves data content permanently with [PORTICO](#).

Why publish with IJPHY:

- Open Access
- Global Visibility
- Quality peer review
- Author retains copyright
- CrossRef and DOI Citation
- Check manuscript status online
- Fast and efficient online submission
- Indexed in many International and national databases

Paper Submission: Register and submit the documents by [clicking online manuscript submission](#) in the menu bar. If there is any problem with the online submission, send documents to editor@ijphy.com along with a cover letter, preferably by the corresponding author. Each manuscript will be provided with a script ID, and all correspondence will be sent through e-mail. Please always refer to the document ID for any further inquiries.

About the Journal

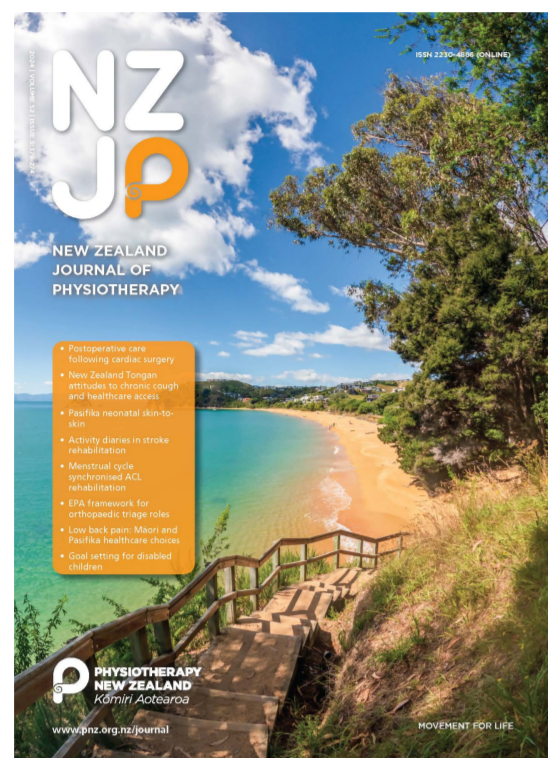

Welcome

Kia ora koutou katoa. Welcome to the *New Zealand Journal of Physiotherapy*, the official journal of Physiotherapy New Zealand.

Since 1938, we have provided a professional research journal that showcases the amazing physiotherapy research happening in Aotearoa New Zealand and internationally. Much of our research has a specific Aotearoa New Zealand context, however, we also publish research on a wide variety of professional and clinical physiotherapy topics and content. We have been registered on Scopus since 2012, offering Open Access publication – all of our present and future journal articles are freely accessible and there are no author fees for publication. Welcome to our *Journal*, we hope you enjoy engaging with us in the promotion of great physiotherapy research.

Current Issue

Vol. 52 No. 3 (2024): New Zealand Journal of Physiotherapy

Highlights in this issue of the NZJP include:

- Postoperative care following cardiac surgery
- New Zealand Tongan attitudes to chronic cough and healthcare access
- Pasifika neonatal skin-to-skin
- Activity diaries in stroke rehabilitation
- Menstrual cycle synchronised ACL rehabilitation
- EPA framework for orthopaedic triage roles
- Low back pain: Māori and Pasifika healthcare choices
- Goal setting for disabled children

Published: 06-12-2024

Full Issue

Editorial

A paradigm shift in sternal precautions and postoperative care after cardiac surgery: Are we there yet?

Emily Gray, Doa El-Ansary

182–184

Research Report

Aotearoa New Zealand Tongan residents’ attitudes to chronic cough and access to healthcare

Angela Upsdell, Sione Vaka, Frederick Lōloa ‘Alatini, Sarah Mooney

185–196

Pasifika parents’ experiences of neonatal skin-to-skin: Insight into culturally responsive care

Cheree Taylor, Anevili Brown Purcell, Dawn Elder, Fiona Graham

197–205

Inpatient stroke rehabilitation activity: Barriers, enablers, and changes in activity behaviour with diary use

Georgia Manning, Ellie Mills, Sarah D’Souza, Alison Kirkman, Paola Chivers, Jessica Nolan

206–218

The effect of menstrual cycle phase-based rehabilitation for females following anterior cruciate ligament reconstruction: A randomised controlled trial

Emma O’Loughlin, Duncan Reid, Stacy Sims, Peter Larsen

219–235

Development of an entrustable professional activities framework for physiotherapists working in orthopaedic triage and assessment roles in New Zealand

Angela Cadogan, Leena Naik, Michael Zo, Monique Baigent, Paul Timothy, Katy Carnachan

236–249

Literature Review

Collaborative goal setting for children with disability within education: A scoping review

Leanne Robinson, Allyson Calder, Lizz Carrington

257–272

Scholarly Paper: Clinical or Professional Perspective

What are possible reasons for the different choices of low back pain healthcare between European, Māori, and Pasifika for services funded by the Accident Compensation Corporation?

Nicola Saywell, Jacob Gordon, Thomas Adams, Imran Niazi, Julia Hill

250–256

HOME / About the Journal

About the Journal

International Journal of Physical Therapy Research & Practice (IJPRP) is the official journal of the Saudi Physical Therapy Association (SPTA) which is committed at being a dynamic, professional and innovative organisation, to promote research & evidence based practice in Physical Therapy, so that a firm scientific knowledge base is developed, from which more effective Physical Therapy practice may be evolved. IJPRP is designed to promote communication within the international rehabilitation to promote excellence in education and practice. The mission of the SPTA is to identify and share common issues, themes and strategies for the enhancement of standards of professional care.

Aims and Objectives of IJPRP:

- **Promoting Research and Evidence-Based Practice:** IJPRP is dedicated to developing a robust scientific knowledge base to enhance the effectiveness of physiotherapy practice.
- **International Collaboration:** We aim to facilitate communication within the global physiotherapy community, promoting excellence in education and practice.
- **Enhancing Professional Standards:** Our mission includes identifying and sharing common issues and strategies to uplift the standards of professional care in physiotherapy.
- **Rapid Dissemination of Research:** We prioritize prompt publication of significant advances and provide a forum for discussing news and issues pertinent to the physiotherapy profession.
- **Global Editorial Representation:** Our editorial team boasts representatives from Asia, Europe, and the American continent, ensuring a diverse and comprehensive perspective.

Why Publish with Us?

- **Rapid Review Process:** Our commitment is to inform authors of the decision on their manuscripts within four weeks of submission.
- **Timely Publication:** Accepted papers are published promptly in the next issue.
- **Open Access:** All articles are freely accessible on www.ijprp.com, ensuring your research reaches a wide audience without barriers.
- **Global Reach and Impact:** Your work will engage and inform a global community of physiotherapists, researchers, and health professionals, contributing significantly to patient outcomes and professional knowledge.

We are looking for original research that aligns with our mission to lead the debate on health and to assist physiotherapists in making informed decisions. Your contributions will play a crucial role in shaping the future of physiotherapy practice and education.

Join us in our endeavor to advance the field of physiotherapy. Submit your manuscripts to the International Journal of Physiotherapy Research & Practice and be a part of a community dedicated to excellence and innovation in health rehabilitation.
